DESIGNED FOR THE RESIDENTIAL AND COMMERCIAL SPRAY FOAM AND SPRAY FOAM ROOFING CONTRACTOR

The Spray Foam Systems ProPak 300 Series of Spray Foam Rigs are a great rig for the professional insulator looking to start off in the spray foam business. The SFS Rig is also a great addition to an existing Spray Foam Contractor. The E-30 Reactor 2 is a powerful machine capable of spraying up to 30 lbs. per minute of material. The SFS Generpak 30 KW, powered by a Kohler engine delivers a powerful load center with enough power and then some. The Rolair compressor provides a dependable air source with enough CFM to run the system and a mixer, allowing you to spray Open and Closed Cell Spray Foam Insulation. The Fusion AP spray foam gun by Graco is the choice of the industry and provides a reliable, easily maintainable and rebuildable SPF gun.

BECOME ELITE:

The ProPAK 300 Series sets itself apart from all the other spray rigs with the all new E-XP2 Reactor 2! With the Advanced Display Module and Graco Insite, as well as data control management updates, the ProPAK 300 Series defines a new standard of mobile spray rig technology.

Setup in a 8x20 ProPAK trailer, the 300 Series can easily be towed by a 3/4 ton truck. There is plenty of room to carry up to three sets of foam and enough space to store ladders and scaffolding. The standard work bench stores all of your safety equipment.

Backed by the powerful Graco E-30 Reactor 2, this rig allows you up to 30 lbs. per minute of material output and up to 310' of hose length. This rig is setup to spray open and closed cell spray foams and the power of the E-30 makes this a very efficient roofing rig.

Stand Alone Unit Powered by an 30,000 Watt Diesel Generator and 5HP Rolair Air Compressor.

Air System includes Graco T3 Transfer Pumps and Atlas Copco Air Dryer.
