

# NITROSYS<sup>+</sup>

PATENT PENDING

## HIGH VOLUME. LOW PRESSURE.

### PLURAL COMPONENT SPRAY GUN

*"If you enjoy spraying with the disposable gun, you will love this new one. Jobs will be cut in half the time and you also get much better foam off of this gun. Worth the purchase, worth the price."*

-Isaac Rascon, Nitrosys N+ gun user

# N+ HVLP

PLURAL  
COMPONENT  
SPRAY  
GUN

## KEY FEATURES :

- Higher outputs
- Rebuildable
- Lightweight
- Ergonomic design
- Low cost replacement parts
- HVLP processing

*"The N+ HVLP Gun answers the market requests of providing a faster spraying, rebuildable spray gun used for the safer, more efficient low pressure applications of the Nitrosys system."*

-TJ Peters, President & CEO

## N+ HVLP BENEFITS :

- Faster re-entry times for other trades
- Faster re-occupancy times for homeowners, and consumers
- Reduced overspray and exposure
- Processes traditional high pressure formulations
- Increased control of spray pattern
- Simple and safe application

**The N+ HVLP Spray Gun allows you to spray as fast as traditional equipment offerings available on the market today, while still maintaining the benefits of a low pressure application.**
